

American Clinic Tokyo Data Crunch Report October 2013 ~ March 2014

67% Males

90% Non-Japanese

38% Word of Mouth & Referral

We asked ourselves the following questions: Who are we treating? Where do patients come from? How are patients finding us? Why are they visiting us? What were the most common diagnoses? How were payments made? We'd like to share some of our findings as it was exciting for us to find out what our practice was all about!
